

	Metric		Imperial	
Collector area	55.74	square meters	600.00	square feet
Collector width	9.91	meters	32.50	ft
Swept circular area under dish	11.60	meter dia.	38.00	ft diameter
Collector height max above ground	6.80	meters	22.30	ft
Receiver height max above ground	9.60	meters	31.50	ft
Foundation footprint (above ground, concrete)	3.4 x 3.4	meters square	11 x 11	ft square
Spacing per dish (typical, can vary)	15 E x 14.5 N	meters	50 E x 48 N	ft
Land area per dish (typical, can vary)	217.5	square meters	2,400	square feet
Dishes per land area (typical, can vary)	46	per hectare	18	per acre
Est. Weight (excluding foundation)	2,000	kg	4,400	Lb
CPV output per land area (at 15 kW rating)	690	kW per hectare	270	kW per acre
Land area per Megawatt CPV (at 15 kW rating)	1.45	hectares per MW	3.70	acres per MW
